

## **Safe at Home**

Victims of domestic violence, stalking and sexual assault and reproductive health care providers (employees, doctors, nurses, therapists, support staff, volunteers, and patients) don't have to be afraid to vote! If you qualify to enroll in the Safe at Home Confidential Address Program, your voter registration information will be kept strictly confidential and none of your personal information will appear on the statewide voter registration database.

The Safe at Home Confidential Address Program provides a no-cost mailing forwarding service for victims of domestic violence, stalking and sexual assault. Reproductive health care providers (employees, doctors, nurses, therapists, support staff, volunteers, and patients) must pay an enrollment fee to receive services. The program is designed to keep participants' addresses confidential—and their assailant from finding them.

By completing a confidential voter registration affidavit at the time of enrollment or by re-registering at the Registrar of Voters or County Clerk's office, Safe at Home participants automatically receive "vote-by-mail voter status." A confidential voter's privileges continue for the duration of their active participation in the Safe at Home program.
